

Level Measurement & Filtration Solutions

Robust Sanitary Transmitters for the Food & Beverage Industry

- ▶ NOSHOK's 20, 25, and 30 Series Intelligent Pressure and Level Transmitters are uniquely designed to address the specific requirements of the food and beverage industry.
- ▶ Ideal for hygienic applications and harsh, aggressive ambient conditions, and backed by a 3 year warranty.

KING-GAGE A NOSHOK Company

- NOSHOK 20, 25 and 30 Series Transmitters feature an industry-proven superior design that positions the pressure and temperature sensors directly behind the diaphragm, which reduces fill fluid and allows the use of a smaller, more durable diaphragm.
- They provide active temperature compensation at the point of measurement to minimize temperature and position error.
- Turndown ratios up to 10: 1 allows greater rangeability, minimizing inventory requirements.
- Constructed of polished Stainless Steel, NOSHOK's transmitters feature programming via a standard onboard display with no pressure source require, also available with Hart protocol.
- These transmitters have a 360 degree rotatable display for flexibility and readability in multiple mounting positions.
- NOSHOK 20, 25 and 30 Series Transmitters can be cleaned-in-place (CIP) or steamed-in-place (SIP), and meet 3A requirements
