

# TIRED OF PREPARING HYDRAULIC HOSES FOR EQUIPMENT PAINTING?

Covering individual hoses is a tedious and time-consuming task. Painting over hoses results in flaking and cracking that ruins the overall look of your equipment.

**THERE IS A BETTER SOLUTION.**

When you order hydraulic hoses from Oil-Air Products, we can apply clear sleeves that create a protective barrier. The process is simple: install the hoses, paint your machine, and remove and dispose of the sleeving.

- Sleeves fully encase hoses for complete protection
- Easier and more efficient than manually covering hoses
- Perforated seam and pull tab allow for fast removal
- Available for most hose lengths and diameters
- Small and large-volume orders accepted

At Oil-Air Products, we offer solutions that help you operate more efficiently.
