

# Why work with **OAP** ?

Oil-Air Products specializes in providing innovative, cost-effective fluid power solutions and products that meet and exceed the ongoing demands of our customers. Our extensive experience in the fluid power industry and our partnership with the world's premier fluid power manufacturers allow us to provide technical, high-quality solutions that help our customers grow their business through reduced operating costs and increased productivity. Since 1983, Oil-Air Products has been a leader in the Fluid Power Industry. *Let us go to work for you!*

## Fluid Power Manufacturers We Represent

Engine, mobile, and industrial filtration solutions.

High-quality hydraulic and electronic propel and control products for global off-highway mobile equipment applications.

Fluid & motion control, mobile and industrial filtration, and sensors.

Hydraulic fittings, adapters, and flanges.

Fluid transfer solutions for hydraulic hosing, couplers, and assembly equipment.

Hydraulic gear pumps and motors.

Hydraulic directional control valves, gear pumps and motors, and electronic remote control systems.

Quick release couplers and multi-connectors.

Hydraulic light duty, medium-duty, and heavy-duty low-speed high-torque motors, steering units, hydraulic brakes, and pumps.

Transducers, gauges, and instrumentation solutions.

A trusted global provider of hydraulic accumulators and components, delivering reliable solutions for diverse fluid power applications.

Axial piston hydraulic pumps and motors. Cylinders, HIC, cartridge, and prefill valves.

Hydraulic, pneumatic, and electric motion control solutions through brands like IMI Norgren, IMI Bimba, and IMI Bahr. Products include actuators, valves, air prep, manifolds, fittings, and Pneumadyne® precision components - driving reliable, innovative automation.

Mobile and industrial lubrication systems and components.

Full line of filtration, valves, clamps, accumulations, hydraulic accessories, test fittings, and diagnostic equipment.

Complete line of NFPA hydraulic and pneumatic interchangeable cylinders.

High-quality welded and tie rod hydraulic cylinders with renowned Hallite seals.

High-performance axial and bent-axis hydraulic pumps and motors.

Mobile and industrial cooling solutions.

FLUID POWER SPECIALISTS

# Fluid Power Manufacturers We Represent

Complete line of flanges and adapters in carbon and stainless steel.

High-pressure vane and piston pumps and motors, Calzoni/Denison radial piston motors.

Piston and diaphragm accumulators, coolers, and heat transfer equipment.

Range of wireless radio solutions for commercial vehicle winches and other industrial applications.

Air-driven hydraulic pumps, power packs, and intensifiers.

Worldwide designer, manufacturer, and integrator of precision motion control products and systems. Servovalves, servoactuators, proportional valves and related servo electronics.

Radio control solutions and products.

Manufacturer of sensors and control products for industrial control applications.

Broad range of pneumatic products including fittings, automatic couplings, valves, pneumatic actuators and FRL units. Products belonging to the Infinity compressed air network and Fluidity fluid valves product lines.

Northman Fluid Power

Hydraulic control valves, solenoid valves, variable displacement piston pumps, vane pumps, and modular valves.

Custom hydraulic and pneumatic systems, assemblies, and power units.

Full line of standard and custom power packs, valves and modular elements.

Manufacturing high-quality products such as hydraulic filters and strainers, reservoir accessories, pressure gauges, o-ring seal tube fittings, hydraulic adapters and hose fittings.

High-quality pneumatic hose, hose fittings, and components.

Custom manifold design and manufacturing with a standard product line, and also a sophisticated source for custom hydraulic manifolds.

Industrial and mobile water/oil and air/oil heat exchangers, accessories, and pneumatic coolers.

Broad range of non-repairable, stainless steel, aluminum, magnetic, corrosion-resistant, and three position pneumatic actuation products.

Radial piston hydraulic motors, gear boxes, and rotary manifolds.

Standard and custom swivels.

Planetary gearboxes, hydraulic winches, and wheel drives.

## OAP Hydraulic System Design Services

### Custom Hydraulic System Integrations & Engineering

Struggling with your hydraulic application? The quality of hydraulic systems, which includes power units, electronic controls, manifold assemblies, lubrication systems, and other components directly impact system performance.

Our systems designers have over 100 years of experience in fluid power product design and application, creating over 1,000 custom hydraulic systems annually for mobile and industrial OEM applications. They also design custom manifold assemblies and lubrication systems to enhance mechanical efficiency and reduce downtime.

As an ISO 9001:2015 certified company, we ensure high-quality standards throughout all production stages, from design to final testing.
